

Supreme Dog Mix

The blend that started it all.

Our original recipe remains our most popular mix, trusted by raw feeders who want the very best for their dogs.

See reverse for full ingredient details

What's in our mix?

Beef

Beef is an excellent quality muscle meat, providing a nutritious, high-quality protein source for dogs. Rich in essential amino acids, vitamins, and minerals, it supports overall health and vitality. Its high protein content aids in muscle development and maintenance, while also promoting healthy skin and a shiny coat.

Chicken

Chicken provides natural calcium and phosphorus from bone content. The finely ground bone also helps support healthy digestion and stool consistency, acting in a similar way to insoluble fibre.

Salmon

Salmon offers a wealth of vital nutrients, including essential fatty acids.

Green Tripe

Green tripe is highly valued in raw feeding for its natural digestive benefits for dogs. It naturally contains digestive enzymes, beneficial bacteria, and essential fatty acids that support healthy digestion and nutrient absorption. Because it is minimally processed, it retains its natural nutritional value, making it a valuable addition to a balanced raw diet.

Organs

A blend of organs including heart, tongue, and kidney provides a rich source of essential vitamins and micronutrients.
